Visual Studio Code

Experience

07/2022 - Present

BMV System Integration PVT LTD

Front

End

Developer

We made applications for the web, android, and IOS, and for this, we use many types of technology like JAVA, JAVASCRIPT, React JS, and Google App Script. So I'm working as a front end developer in React JS and Google App Script.

In React Js.

Responsibility: As a front-end developer, I find bugs and implement new things in existing projects.

Achievements: I made Export excel functionality in the table component.

- I made Ideal screen time out for the whole application.

In Google App Script.

Responsibility: As a front-end developer, I find bugs and implement new things in existing projects.

Achievements: I made a mail merge system for our clients, In this system If anyone wants to send mail to every client individually at that time this system works.

- I made a working management system for our staff, In this system, if employees are not completed their working hours it can detect that employee's name and send them a mail regarding this.

02. 2022 - 07.2022
